QSR NVIVO 11 Overview NVIVO is the perfect software for storing, managing and analyzing data statistics. In fact, it is an integrated environment to store all kinds of files, text, video, audio and more. You can easily record all office documents, word, slides, PDF files, information tables, databases related to projects or research on this application. Along with each file, it can provide additional information, important points and initial results. Then, you can analyze quantitatively and qualitatively through the tools of this software. For example, there is the possibility to search the entire text in the stored information. It is also possible to find words similar or related to a particular keyword key easily. All data is stored in the information nodes, which are based on the various factors of these nodes. All the information of this program is stored in the form of a single database, which makes it easy to get a backup of the program data and saves it in the desired location. Of course, large files, such as documentaries or audio clips and speeches of large volumes, can be stored separately from the database to reduce the number of backups. This program is well compatible with other statistical programs and office products, and it is possible that you open the data in the related software. Researchers, experts and students from various disciplines, especially in the fields of statistics, government agencies, social workers, NGOs and many managers, with the help of this program, can gain qualitative information and useful results from the volume of data implementation.
