Plants vs. zombies 3 platforms. Plants vs zombies 3 where to play.

"Try it! It's free!" Allen Murray, PopCap senior producer shouted at PocketGamer about free-to-play mobile game Plants vs. Zombies 2: It's About Time. "Our hope is that you'll have so many hours of fun, you will want to spend a few dollars." Murray's definition of 'fun' might differ from a lot of other people's, and though Plants vs. Zombies 2 received near-total positive reviews, many dissenting critics still called out its free-to-play approaches as detrimental to enjoyment. What with Angry Birds Go!'s outrageous £34.99 (\$49.99) pricetag for a single Big Bang Special Edition kart, the seedier side of IAP has never been under more scrutiny. But do publishers and developers even care? Plants vs. Zombies 2's star system was singled out as its major barrier to seamless, peniless fun. In order to progress beyond a given area, an arbitrary number of stars had to be collected, awarded based on how efficient you are at fulfilling a number of criteria in each level. The stars only became active after playing through said area, so only after playing through the core levels did the stars become available. Sure, you could go back and retrace your steps like a chump, or pay right there to carry on. Is anyone really willing to shell out that much? In response to these criticisms, PopCap has just released a hefty Christmas Update. Along with a new map, features and foes, the star system and map have both been removed and re-jigged, streamlined for quicker and easier progression. So we carried out a mini investigation, pitting a paid-up player of the vanilla version - at our expense of £18 (about \$30, AU\$32) - against a free-playing Christmas update user, to see if PopCap has found a better balance - or if the person who doesn't pay is guaranteed to find themselves at a disadvantage. **Zombie nation** We enlisted the help of Katherine and Robert Egan, brother and sister, because nothing spells parity and fairness like participants sharing roughly fifty percent of their DNA. Both played on an iPhone 5. Katherine paying up front whilst Robert was barred from even thinking about doing so. Rob was immediately taken in by PvZ2, the entire concept a welcome dose of whimsy. "I love the whole going back in time for a taco thing. It's just illogical, which is the best way to go for apps," he said. Both were instant fans of the gradual build-up each level. Katherine praised the open approach and the way it facilitates "personalised defences", while Rob found each level "a lot" shorter than the first game, but the pacing still seemed "right", as if condensed. On the fourth in-game day, Katherine just about managed to stave off the waves and found this level "noticeably harder". Rob found it too become "trickier quite quickly" but relished the challenge. Then, inevitably, came the store. "Nothing too appealing about it as far as I'm concerned," stated Rob. "It seems pointless when the game itself offers a variety of ways to get money anyway, as long as you're skilled enough." A fair point, but a free-to-play game that offers everything for free might please Karl Marx, but won't feed a developer. Gimmicks in the garden When it came to Plant Feed, a temporary speed buff unlocked through either purchasing or killing carriers, Katherine found it "helped" as a welcome modifier, changing up the flow of gameplay, rather than just a cash-grabbing gimmick. Similarly, Rob loved it and called it his "favourite addition" and said "it's the difference between losing a plant." Even though more can be purchased with coins, Rob said he felt "the game supplies you with as many as you'd need" and didn't make him feel at a disadvantage, though he wasn't repelled by the idea of purchasing more from his own wallet. This was an important point. Page 2 With only Katherine having to deal with stars, she questioned, "Why don't you get them first?". But at "only £2.99" for what she saw as a lot of "new content", she gladly moved on, caring little for the uncollected stars. Robert's still playing, oblivious to what came before, but has never felt at a huge disadvantage against someone who would be willing to pay out for all the available upgrades. He felt "the game supplied enough for me not to pay", and would gladly continue as a casual "toilet or travel game". Overall Katherine saw some of the IAP elements a "moneygrabby" yet "necessary evil". In single-player games like PvZ2 she sees it as "acceptable as I'm not gaining advantage [over others]". These "extras" she saw as "probably the best way to make money" in a free game, emphasising that these purchases are entirely optional and that she didn't at all mind paying forward. Katherine has since downloaded of her own volition, the removal of the star system a "very, very welcome" update, and almost literally hasn't put it down since. Greed isn't good Kirk Mckeand, mobile expert and columnist for PocketGamer.biz, told us that he believes PvZ is among the minority of free-to-play games getting it right at the moment. "Finding the balance in F2P is difficult and, in my experience, not many games do it right," he said. "The way PvZ2 approaches F2P, however, is much more acceptable than most. Although the spikes in difficulty are there to tempt the player into paying, it's at least optional, with grinding there as an alternative." Energy systems exist in other games, completely barring any progress unless you either wait or pay and, once you experience it first-hand, the optional extras of PvZ don't seem so bad. If people are enjoying a free game, the option to give the developer some money is welcome for most people. "It's in the targeting of whales when F2P ethics become murky. It's easy to think the people spending silly money on uncapped transactions are silly, but many of these games are targeted at children." PopCap's removal of the star system with the Christmas update is a grandly welcome gesture that's filleted out the muckier gubbins. That delicious goozy zombie centre is still there and as impulsive as ever, but it feels as though someone has realised something important: freemium games shouldn't make the non-paying player feel disadvantaged. Tony Leamer, product marketing manager for PvZ 2 told us: "We were hearing from a lot of players that it was simply too difficult to get from one world to the next, so we wanted to make that experience available to more players." He added: "Our approach has always been to create fun, accessible experiences, then to listen to our players and fans to make these even better." The need for F2P to monetise will invariably rub up against the flow of gameplay, but as far as this practice goes it seems especially with this new update, PopCap is learning and has demonstrated a real caution in keeping Plants vs. Zombies unblemished. It's just a shame that the same can't be said for a lot of other free-to-play games out there at the moment. Want to know the best iOS games out at the moment? Then head over here.
