In order to continue enjoying our site, we ask that you confirm your identity as a human. Holt Online Learning provides students with access to supplemental educational material. This educational material is used for specific college courses and textbook subjects. Most of the available online materials are digital textbooks, different types of online assessments, and various related learning resources designed for both students and instructors. Holt Online Learning is an e-learning platform under the funding and guidance of the Houghton Mifflin Harcourt publishing company. Typically, students end up accessing the Holt Online Learning program one of two ways. Their school district or perhaps their specific school may decide to implement a Holt Online Learning program to go alongside specific Holt McDougal textbooks. Students are usually given instant access the Holt Online Learning program through what is known as a "Holt Online Learning login code", "Holt Online Learning access card", or the "Holt Online Learning key code". Students seeking this login information should consult with their instructor. Helpful documentation on how to register for the Holt Online Learning program can be found at the Holt Online Learning General Information and Registration page. The program provides online versions of Holt McDougal textbooks and supplementary material for the following course subjects: Reading and Language Arts, Mathematics, Science and Health, Social Studies, World Languages, and other areas. Holt Online Learning's Reading and Language Arts sections includes programs on "The Elements of Literature" and "The Elements of Language". The online Mathematics programs include materials on Pre-Algebra, Algebra 1, Algebra 2, and Geometry. The online Science and Health programs primarily include materials on Earth Science, but also cover broader disciplines of Biology and Physics. The online Social Studies programs cover United States Government, Psychology (for textbooks such as Holt Psychology: Principles in Practice), and Sociology. The World Language's area covers most of the popular languages with textbooks like Komm mit! and Expressate!. The Holt Online Learning program offers online material for state specific textbooks (e.g. Holt Mathematics Course 3 Texas). To find out which textbooks are supported by the Holt Online Learning program, click here. The other route, though less common, that some students take is simply purchasing the Holt Online Learning program themselves, even though it is not necessarily required to complete their desired course. Many students report gaining a better understanding of their course material with the additional assistance provided through the Holt Online Learning platform. The online programs can help certain students that might learn differently than other students in their classrooms. These online programs tend to provide more interaction, case studies, and real world applications of the course materials than their printed textbook counterparts. The Holt Online Essay Scoring System is included within several subjects and sections of the Holt Online Learning platform. This essay scoring application is particularly popular among students and instructors, mainly due to its ease of use and ability to critique essays. Additionally, Quantum Artificial Intelligence Tutors are yet another online service provided by the Holt Online Learning platform. Holt Online Learning, along with the platform's corporate foundation originally represented by the Holt, Rinehart and Winston company, has recently undergone some upgrades and additions. As a result of these recent changes, the Holt Online Learning program is now officially known as ThinkCentral. Think Central can be accessed by going to the new website address located at ThinkCentral.com (previously located at go.hrw.com). Some "online versions" of textbooks published by Holt, Rinehart and Winston and McDougal Littell are still accessed through my.hrw.com, which is the Holt McDougal Online program. Many thanks.
